Objective

Second-year B.E. Computer Science Engineering student with a strong interest in Artificial Intelligence and Machine Learning (AI/ML). Passionate about solving real-world problems through technology and building practical software solutions. Skilled in Python, Java, frontend development, and problem-solving, with hands-on experience in developing responsive web applications and learning modern AI technologies.

Education

Dayananda Sagar College of Engineering, Bangalore 2024 – 2028
B.E. in Computer Science & Engineering CGPA: 8.2

Alva's PU College, Moodbidri, Mangalore 2024
Class XII 91%

Technical Skills

- **Programming Languages:** C++, Python, Java, JavaScript
- **Web Development:** MERN Stack, React, Node.js, Express.js, MongoDB, HTML, CSS
- **Database & Tools:** MySQL, Supabase, Git, GitHub, VS Code, Vercel
- **Core Concepts:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems

Projects

StudentOS — Student Career Management Platform GitHub
React, Tailwind CSS, Supabase, PostgreSQL, Google OAuth, Recharts Live Demo

- Developed a full-stack student career management platform to centralize internships, jobs, hackathons, scholarships, and project tracking in a single dashboard.
- Implemented Opportunity Hub, Project Manager, Eligibility Checker, and Career Dashboard with secure Google authentication and real-time database integration using Supabase.
- Built responsive dashboards featuring progress analytics, deadline monitoring, project tracking, and profile-based eligibility matching to improve career planning and organization.

Dhwani AI — AI-Powered Patient Engagement System GitHub
HTML, CSS, JavaScript, Node.js, Express.js, Supabase, Twilio, Groq AI

- Developed an AI-powered healthcare platform for automated medicine reminders and multilingual patient interaction.
- Integrated Twilio voice APIs and AI-based response analysis for real-time healthcare communication workflows.
- Designed scalable backend systems for patient data management and intelligent response processing.

Blood Banking System — Blood Donation Management Platform GitHub
HTML, CSS, JavaScript, Node.js, Twilio

- Developed a blood banking management platform for handling donor registration, blood availability tracking, and emergency communication workflows.
- Integrated Twilio services for notification and communication support between donors, hospitals, and blood banks.
- Designed responsive interfaces and backend functionalities for efficient blood request and management operations.

Cricket Pro — Online Cricket Equipment Shopping Platform GitHub
HTML, CSS, JavaScript

- Developed an online shopping platform for cricket equipment and accessories with responsive user interfaces.
- Implemented product browsing, category filtering, and interactive shopping functionalities for improved customer experience.
- Focused on frontend performance, usability, and accessibility for sports product management.

VoiceGuard AI — AI-Based Fake Call Detection System GitHub
HTML, CSS, JavaScript, Node.js

- Developed an AI-powered call analysis platform designed to detect fake and AI-generated voice calls.
- Implemented intelligent detection workflows and backend processing systems for analyzing suspicious communication patterns.
- Focused on improving cybersecurity awareness and preventing digital voice fraud using AI concepts.

GridWatch — Smart Infrastructure Optimization System GitHub
React, Tailwind CSS, FastAPI, Python, React Flow, Recharts

- Developed a smart infrastructure simulation system using Minimum Spanning Tree algorithms and memory allocation strategies for optimized network connectivity.
- Implemented Prim's and Kruskal's algorithms along with First Fit, Best Fit, and Worst Fit memory allocation techniques for routing and fragmentation analysis.
- Built interactive visual dashboards and dynamic graph simulations for infrastructure monitoring and analytics.

Hackathons & Competitions

HackMatrix 2.0 — 2nd Place Winner

IIT Patna — 36 Hour Hackathon

Dhwani AI — AI-Powered Patient Engagement System

- Secured 2nd position at HackMatrix 2.0 conducted at IIT Patna in collaboration with JioHealth and NJACK.
- Participated in a 36-hour hackathon focused on AI-powered healthcare communication solutions.

The Big Hack — 24 Hour Hackathon

Acharya Institute of Technology

Cyber Lens — AI-Based UFDR Report Analysis Tool

- Participated in a 24-hour national-level hackathon focused on cybersecurity and digital forensic solutions.
- Contributed to the development of an AI-powered forensic report analysis system for investigation workflows.
